SERVICES CATALOG

AvePoint Client Services (ACS) provides world-class business and technical experts to help you maximize your Office 365 and SharePoint investments. AvePoint offers both fixed-cost and custom consultative engagements aimed at driving more value from your existing Microsoft investments.

ADVISORY & IMPLEMENTATION SERVICES

AvePoint's Advisory & Implementation Services provide expert guidance and industry best practices to ensure your technology investments meet your strategic business needs.

READINESS WORKSHOPS

Data Governance Readiness Workshop	This one-day interactive workshop helps you drive business value with effective data governance and compliance strategies. We will provide you with the ability to recognize the main factors that influence the success of your data governance strategy, and adjust for long-term success.
Migration Readiness Workshop	SharePoint and Office 365 migration projects are well known for being complex and resource intensive. In this customized workshop, our experts will guide you through developing your plan for managing people, processes, and technology to ensure a successful migration.
Sustainable Adoption Readiness Workshop	In this workshop, we will guide you through the creation of a sustainable adoption plan as well as share best-practice adoption knowledge and tools. This plan will be the foundation for ensuring your users take advantage of Office 365 and SharePoint's full capabilities.

PLANNING & ROADMAP SERVICES

SharePoint & Office 365	The SharePoint and Office 365 Roadmap service accelerates deployment of your Microsoft technologies to drive business value in your investments. AvePoint's Microsoft-certified experts will work with your key stakeholders to develop a roadmap with prescriptive steps to align SharePoint with your workloads and business needs.
Governance and Information Management	The SharePoint Governance and Information Management Roadmap service provides a strategic, multi-staged plan for maturing your data governance model. Our experts assess the state of your data, policies, and processes to develop actionable steps for your organization to meet compliance and governance requirements.

IMPLEMENTATION SERVICES

SharePoint Health Check	Through the SharePoint Health Check service, we will review and assess the current state of your SharePoint environment to gain visibility into potential and unnoticed issues. We will then align your SharePoint environment with Microsoft-recommended best practices and ensure scalability for future growth.
SharePoint Infrastructure	Our SharePoint Infrastructure service provides a full implementation service to accelerate SharePoint deployments from design through execution. Our experts will work with you to ensure a successful SharePoint implementation that meets Microsoft and AvePoint best practices for your on-premises or Infrastructure-as-a-Service (IaaS) hosted SharePoint implementation.
SharePoint & Office 365 Collaboration Portals	Our portal implementation services for SharePoint and Office 365 provides a flexible and efficient intranet capable of optimizing your intranet publishing, document management, and internal collaboration needs. All portals are designed in accordance to customer branding guidelines as well as Microsoft best practices.

MIGRATION AS A SERVICE

AvePoint Migration as a Service (MaaS) is a white glove approach that handles migration complexity so you don't have to. Industry-leading migration technologies and best practices are applied by the experts who know them best – ensuring your smooth transition to Office 365 or SharePoint from start to finish.

PRODUCT QUICK START SERVICES

AvePoint's Product Quick Start Services provides you with accelerated implementation of our enterprise-level products, first-hand knowledge, and product training so you get the most out of your investments.
