

Connector

Migrate. **Integrate.** Manage. **Optimize.** Protect. Report.

Integrate. Optimize. Present and manage file-based documents and media content directly in Microsoft® SharePoint® 2010 without migration.

Key Benefits

- Unify delivery of file share content in SharePoint, providing end-users with a single point of access to all enterprise digital assets
- Avoid potentially long, costly, and disruptive migration projects by automatically exposing up to petabytes of file share content through SharePoint
- Leverage all of SharePoint's document management and presentation functionality on connected content for seamless user access, interaction, and content management
- Keep SQL resources optimized by minimizing the amount of data stored in SharePoint

Seamlessly present, manage, and access file share content through SharePoint 2010.

Unify Delivery of File Share Content without Migration

With DocAve Connector for SharePoint 2010, collaborate upon network file shares and cloud storage resources directly through SharePoint without migration. Connected content – including documents, audio, or video files – appears as normal SharePoint content through existing or customizable SharePoint libraries. Manage connected content with all of SharePoint's powerful document management functionality, including permissions management, workflows, alerts, and versioning.

Technical Overview

- Leveraging Microsoft's BLOB Storage (EBS & RBS) APIs, file share content can be managed using all of SharePoint's management and collaboration tools, including versioning, workflows, and alerts
- DocAve Connector SDK enables administrators to automatically provision, configure, sync, and deploy connected libraries, granting unmatched flexibility to expose file share content in SharePoint
- Connect any network addressable file share or cloud-based storage system directly to SharePoint
- Leverage SharePoint's native, full text search functionality including FAST Search – as well as all other search tools that utilize the standard SharePoint APIs – on attached file shares
- Integrate security and permissions for all attached file share data with SharePoint's permissions management
- Present and modify connected content directly through Microsoft® Office applications or third-party tools, just as if the content resided in SharePoint's Microsoft® SQL Server® database
- Stream audio and video files directly to the browser via a dedicated media library that caches files through the Content Distribution Network for fast, intelligent delivery
- Fully customizable synch-options enable event-based synchronization between SharePoint and file shares, ensuring that the latest content is always presented in the file share
- Integrate with other DocAve storage optimization solutions to manage, clean, archive, and tier legacy data storage systems via automated business-rule driven policies

Attach any supported network or cloud file share to SharePoint without the need for migration.

As with all DocAve products, DocAve Connector leverages only fully supported Microsoft methodologies and APIs.
