

Content Manager

Migrate. Integrate. **Manage.** Optimize. Protect. Report.

Migrate. Manage. Simplify enterprise content organization, restructuring, and management for Microsoft® SharePoint® 2010.

Key Benefits

- Comprehensively copy, move, migrate, and restructure SharePoint sites, content, and topology within or across SharePoint environments
- Easily respond to evolving information governance policies or organizational structure changes by managing enterprise content through a single, highly intuitive management console
- Manage content in real-time, or leverage customized scheduling to propagate changes to SharePoint content outside of production hours
- Microsoft® Office 365 compatibility allows administrators to seamlessly restructure content on premise or within hybrid environments

Restructure the content and topology of SharePoint environments easily while maintaining all content, configurations, security and metadata.

Quickly and Efficiently Restructure Enterprise-wide SharePoint Environments

DocAve Content Manager for SharePoint 2010 provides administrators with the ability to comprehensively move, copy, and restructure SharePoint sites, content, and topology within or across SharePoint environments – including to Office 365. Through a centralized, highly intuitive management console, featuring familiar ribbon-based controls and wizard-based, step-by-step guidance, administrators can seamlessly manage and restructure SharePoint content with minimal interruption to business processes in order to quickly respond to evolving information governance requirements.

Technical Overview

- Manage content within or across all farms through a single, intuitive interface featuring familiar ribbon-based controls and wizards for “step-by-step” guidance
- Office 365 compatibility allows administrators to seamlessly migrate content from on-premises farms to cloud-based site collections
- Migrate, copy, move and restructure content – including content externalized by DocAve Archiver, Connector, or Storage Manager – within or across different locations, servers, and farms, all with full fidelity
- Simplify cross-domain migration, restructuring and reorganization by graphically mapping domains, users, and permissions, ensuring all data and metadata is fully maintained
- Promote or demote sites on-the-fly and copy content – from list to list, library to library, or site to site – according to business requirements across multiple SharePoint environments or content databases
- Attach and Merge features simplify the promotion and demotion of sites or site collections for intuitive content restructuring
- Maintain list and library integrity with full support for all list types – including document libraries, issues lists, Discussion Threads, and Announcements – as well as content metadata and configurations
- Easily migrate content across development, staging, and production environments with ease to reduce deployment time windows, improve IT productivity, and populate development environments with content representative of production environments

Restructure the content and topology of your SharePoint environment.

As with all DocAve Products, DocAve Content Manager for SharePoint 2010 leverages only fully supported Microsoft methodologies and APIs.
