

AvePoint[®] and Cadac Organice[™] Forge Partnership

New agreement to make AvePoint's SharePoint[®] infrastructure management solutions available within the Organice Product Suite

Heerlen, the Netherlands – May 4, 2009 — AvePoint, the leading provider of infrastructure management software solutions for Microsoft[®] SharePoint, today announced a partnership agreement with Cadac Organice[™], maker of Organice, a best-of-breed document management solution for project-driven organizations. As a result of this partnership, Cadac Organice will be empowered to offer AvePoint's SharePoint solutions to customers as part of the Organice Product Suite, an engineering document management and control solution based in SharePoint.

"We are thrilled to partner with Cadac Organice", said Dr. Tianyi Jiang, AvePoint's Chief Operating Officer. "Cadac Organice's software solutions have become an important and much relied upon tool for the engineering community, and we are pleased that our SharePoint backup, administration, archiving, compliance, and migration solutions will now be paired with such a respected platform."

AvePoint's award-winning DocAve Software Platform is a full-spectrum infrastructure management and protection solution for Microsoft SharePoint Products and Technologies. With a unified, browser-based user interface and a fully-distributed architecture, DocAve offers 16 independently-deployable modules for backup and recovery, administration, replication, compliance, eDiscovery, archiving, and migration.

Organice is a software suite for engineering document management and control that leverages Microsoft SharePoint as its backend. Organice helps project-driven organizations manage documentation and efficiently control distribution and tracking. Organice is easy to use and drastically streamlines the business processes of project-driven organizations.

Through its offering of AvePoint's DocAve Software Platform, Cadac Organice can now deliver a fully protected, optimally managed, and totally secure SharePoint-based engineering document management and control solution that supports the business-critical operations of its customers.

Paul Smeets, CTO Cadac Organice: "Solutions based on Organice and SharePoint are business critical to our customers. Their SharePoint repositories contain some of their most important assets such as drawings and contracts. Especially in engineering environments there is a constant push to improve and change these software solutions to keep them aligned with our customers' needs. With AvePoint's software our customers have much better control over their change management in SharePoint and can really benefit from the flexibility the platform offers."
