

AvePoint Customer Anglo American Featured in Microsoft® Case Study

Anglo American synchronised Microsoft SharePoint data across three continents and more than 20,000 end-users with DocAve, increasing company-wide adoption of the SharePoint platform

Johannesburg, South Africa — March 1, 2011 — AvePoint, a proven leader in providing infrastructure management software solutions for Microsoft SharePoint Products and Technologies, today announced its customer – global mining giant Anglo American – has been featured in a Microsoft case study. Entitled “Anglo American Seamlessly Synchronises SharePoint Content Worldwide”, the case study references the successful, real-time and scheduled synchronisation of approximately 600 gigabytes of data among its geo-distributed SharePoint environments in Africa, Australia, and South America with DocAve.

“We are excited that Microsoft has decided to publish our work at Anglo American as an official case study. Through the use of our leading replication technology, which falls within our DocAve platform, Anglo American is able to seamlessly replicate vital content and data across its geo-distributed SharePoint environments”, said Garth Luke, Vice President of Sales for AvePoint. “Anglo American is a perfect example of how companies can adopt Microsoft SharePoint to enhance the way they conduct daily business and increase productivity across their enterprises without being constrained by distributed physical locations, network latency, and bandwidth constraints.”

AvePoint's flagship solution, the DocAve Software Platform, is a comprehensive, truly integrated SharePoint infrastructure management solution that unleashes the platform's full potential. With a unified, browser-based user interface and a fully distributed architecture, DocAve delivers solutions for organisations utilising SharePoint for enterprise content management, web content management, greater platform collaboration and adoption, hybrid management, and infrastructure management.
