

Colligo and AvePoint Complete Integration Testing and Certification of Industry Leading SharePoint Product Suites

Top SharePoint ISVs collaborate to ensure seamless interoperability of respective products

Vancouver, BC and Jersey City, NJ — May 3, 2011 — Colligo Networks and AvePoint today announced that they have successfully completed integration and compatibility testing of their respective award-winning SharePoint product suites, Colligo Contributor and the DocAve Software Platform. The company's mutual customers worldwide are now able to immediately deploy Colligo and AvePoint products to create a pre-tested, end-to-end solution for SharePoint email, document and lifecycle management.

"Colligo plays an active role in the SharePoint ISV partner community to ensure our email and document management solutions work properly with the other SharePoint solutions that our customers are deploying," says Ed Kaczor, Vice President of Colligo. "AvePoint's infrastructure management solutions are the industry standard and we are very pleased to have worked with them on compatibility testing to ensure the seamless interoperability of our product suites."

"SharePoint 2010 offers unmatched opportunities for organizations to streamline their business processes and foster true, enterprise-wide collaboration," says George Petrou, Vice President of Product Management at AvePoint. "The SharePoint solutions from Colligo and AvePoint help organizations to immediately unleash SharePoint to address their specific business objectives without the pain of performing custom third-party solution integration."

AvePoint's award-winning DocAve Software Platform is a comprehensive and fully integrated infrastructure management and protection solution for SharePoint 2010. With a unified, browser-based user interface and distributed architecture, DocAve offers more than 30 independently deployable modules for SharePoint 2010 data protection, administration, replication, migration, archiving, deployment management, reporting, storage optimization, and content lifecycle management.

The Colligo Contributor suite drives SharePoint adoption by enabling users to easily access, capture, and tag SharePoint content from popular desktop applications, including Microsoft Outlook and Windows Explorer. Information workers can instantly create, view, modify SharePoint documents, forms, lists, and metadata—online and offline—including the ability to drag-and-drop email and attachments directly from Outlook to SharePoint.

The pre-tested SharePoint email, document and lifecycle management solutions from Colligo and AvePoint are available today. For more information, please visit <http://www.colligo.com> or <http://www.avepoint.com>.
