

CorasWorks and AvePoint Announce Comprehensive Support of Microsoft SharePoint Server 2010

CorasWorks' powerful SharePoint applications and solutions, coupled with AvePoint's best-in-class infrastructure management software, empower organizations to take full advantage of SharePoint 2010

Reston, Va. and Jersey City, NJ – June 2, 2010 – CorasWorks Corporation, a leading provider of off-the-shelf business applications and solutions for Microsoft SharePoint, and AvePoint, the leading provider of infrastructure management software solutions for SharePoint, today announced a joint initiative that provides customers with true end-to-end support of Microsoft SharePoint Server 2010, from best-of-breed line of business applications, to powerful infrastructure support for SharePoint 2010 data protection, administration, content lifecycle management, archiving, auditing, replication and migration. The end-to-end support is currently available as a result of the 2010 products already released by both companies.

Two of the best-known SharePoint ISVs worldwide, CorasWorks and AvePoint, are working together to ensure organizations have a complete SharePoint solution that addresses the entire platform, beginning with the application layer and covering all aspects of SharePoint protection, management, optimization, and integration. CorasWorks is best-known for its applications and solutions for SharePoint, while AvePoint is renowned for its award-winning DocAve Software Platform, a comprehensive infrastructure management and protection solution for SharePoint. With a unified, browser-based user interface and a fully distributed architecture, DocAve offers more than 25 independently deployable modules for SharePoint 2010 data protection, administration, compliance, migration, reporting, and storage optimization.

Through the combined efforts of CorasWorks and AvePoint, any customer deploying SharePoint Server 2010 can rapidly deploy Applications and Business Solutions from CorasWorks, such as Idea Management, Project Portfolio Management, or a Help Desk. Organizations can also rest assured that they have the tools necessary to comprehensively protect, manage, optimize, integrate, and govern their entire SharePoint environment with AvePoint's flexible DocAve Software Platform.

"With the 2010 release, SharePoint has matured into the dominant platform in the market", said Dan Naselius, Chief Operating Officer at CorasWorks. "As such, it is critical that companies begin leveraging SharePoint to make their business more productive and not spend unnecessary time and money on custom solutions. With AvePoint, we are proud to offer a top-to-bottom solution for everyone in the organization from the business user through the SharePoint administrator."

CorasWorks recently announced the first wave of its next-generation applications and solutions for SharePoint 2010. The applications and solutions include Project Portfolio Management, a Help Desk, Idea Management, and IT Project Management. All CorasWorks applications and solutions are accessible through any mobile device.

"SharePoint Server 2010 is revolutionizing how organizations are managing and organizing their business processes to stay ahead in today's fast-paced business environment", said Tony Lanni, Vice President of Corporate Strategy at AvePoint. "Consequently, it's vital that companies address both end-user and administration challenges for their SharePoint deployments. We're proud to team up with CorasWorks and offer the global SharePoint community a truly comprehensive, enterprise-wide solution to unleash SharePoint's true potential."

The latest release of AvePoint's flagship product – the DocAve Software Platform v5.5 – provides full support for SharePoint Server 2010. This latest DocAve release delivers enhanced functionality across its entire suite of modules, providing organizations with the tools necessary to successfully steward the deployment of their SharePoint Server 2010 environments.

In order to educate organizations on the best practices, strategies, and tools available for successfully deploying, managing, and optimizing SharePoint, CorasWorks and AvePoint are co-sponsoring a half-day seminar on Tuesday, June 8, in Tampa, FL. The companies will also be exhibiting at Microsoft Tech•Ed 2010 North America from June 7 through June 10 in New Orleans, LA. Stop by CorasWorks' booth, #345, and AvePoint's booth, #2501, for more details on how to comprehensively optimize SharePoint Server 2010 environments.
