

AvePoint Announces that Partner Grace-Hunt has Earned Two ACE Certifications

The AvePoint Certified Expert (ACE) Program provides partners worldwide with formal, in-depth training on AvePoint's best-in-class software solutions for Microsoft SharePoint

Jersey City, NJ — July 20, 2010 — AvePoint, the leading provider of infrastructure management software solutions for Microsoft SharePoint Products and Technologies, today announced partner Grace-Hunt has successfully completed the AvePoint Certified Expert (ACE) training program. As a result of this training, Grace-Hunt, one of North America's premier SharePoint consulting and services providers, is fully qualified to recommend, deploy, and configure AvePoint's SharePoint infrastructure management solutions, and can provide its clients with comprehensive consulting to fully utilize AvePoint technologies for SharePoint success.

"We're very excited to have Grace-Hunt certified through our ACE Program", said David Waugh, Vice President of Corporate Development at AvePoint. "Grace-Hunt can now provide clients with comprehensive guidance on how to better utilize the industry's most powerful tools for SharePoint infrastructure management."

The ACE program provides AvePoint partners with in-depth training on AvePoint product installation and configuration, as well as how to fully leverage its tools for SharePoint data protection, administration, replication, migration, archiving, deployment management, reporting, storage optimization, and content lifecycle management. Partners seeking ACE certification must attend a series of live and web-enabled training sessions as well as pass both an online and oral examination. The more comprehensive Technical-ACE certification demands additional technical training and requires the participant to deliver a technical presentation to AvePoint engineers.

Grace-Hunt Senior Solutions Developer Geoff Varosky was the first to complete AvePoint's training program, receiving the Technical-ACE certification on Friday, May 7. Grace-Hunt Senior Systems Engineer George Olson was the second to successfully finish the program, receiving his Technical-ACE certification on Wednesday, June 9. Both Mr. Varosky and Mr. Olson received one-on-one training from AvePoint's engineers to enhance their technical expertise of AvePoint's flagship product, the DocAve Software Platform, which consists of more than 25 independently deployable modules to aid in stewarding successful SharePoint deployments.

"We are very excited about our AvePoint partnership", said Tim Enright, Vice President of Sales and Marketing at Grace-Hunt. "The DocAve Software Platform provides the features that our clients need to efficiently manage their SharePoint resources. Our consultants' AvePoint certification allows us to better help our clients achieve their goals."
