

AvePoint[®] is Named to Deloitte's 2009 Technology Fast 500[™] List

***With 1800% revenue growth over the last five years, AvePoint is ranked the 96th fastest growing company in
North America, and 14th in the Tri-State area***

Jersey City, N.J. – October 22, 2009 — Deloitte LLP today announced that AvePoint, maker of the world's most comprehensive infrastructure management software solutions for Microsoft SharePoint, has ranked #96 on its Technology Fast 500[™] List, which ranks the 500 fastest growing technology, media, telecommunications, life sciences and clean technology companies in North America. Rankings are based on percentage of fiscal year revenue growth during the five year period from 2004–2008, during which AvePoint revenues grew 1800% percent. Joining AvePoint on this year's list are other global innovators, including Sirius XM Radio Inc. and Google Inc.

Dr. Tianyi (TJ) Jiang, AvePoint's chief operating officer, credits AvePoint's sustained growth to two of the company's guiding commitments: Delivering best-in-class customer service, and recruiting the most creative and talented individuals to join its team.

“We are honored to be named to Deloitte's Technology Fast 500 List”, said Dr. Jiang. “From the very beginning, AvePoint has been guided by two core beliefs. The first is that if you recruit only the very best minds, and create a working environment that fosters creativity, ingenuity, and teamwork, your products will stand head-and-shoulders above the competition. Our second, equally important conviction is that first-class customer service is critical to building a first-class company. From day one, we have recruited only the very brightest talent, and ensured that their efforts are dedicated to fully supporting our customers as they seek to leverage SharePoint for success. Being named to the Deloitte Technology Fast 500 is a great honor, and it serves as a testament to the virtues of building a company based on these principles”.

A Trusted Leader in the SharePoint Community

AvePoint has been the premier SharePoint infrastructure management solution provider since the platform debuted in 2001. Since its founding, AvePoint has regularly delivered pioneering and innovative tools that empower organizations to protect, optimize and efficiently manage their SharePoint deployments. With the upcoming release of SharePoint 2010, AvePoint products will continue to assist businesses and government organizations as they leverage the next generation of SharePoint Products and Technologies for business productivity, collaboration, and information content management.
