

AvePoint's DocAve Software Platform Delivers Beta Support for Microsoft Office 365

DocAve provides a single platform upon which organizations can confidently manage on-premises and cloud-based deployments of Microsoft SharePoint Products and Technologies

Berlin, Germany – November 8, 2010 – AvePoint, the world's largest provider of infrastructure management software solutions for Microsoft SharePoint Products and Technologies, today announced that the DocAve Software Platform provides beta support for Microsoft Office 365, which includes SharePoint Online. DocAve enables seamless migration to online SharePoint environments, accommodating content from 14 different legacy sources as well as hybrid management of on-premise and cloud SharePoint environments through a single software platform.

"Microsoft Office 365 has the potential to fundamentally change the way organizations utilize cloud computing to manage their business processes, knowledge workers, and enterprise-wide information in today's extremely competitive business landscape", said George Petrou, AvePoint's Vice President of Product Management. "AvePoint has worked closely with many organizations wishing to maintain current on-premise SharePoint deployments and incrementally add data and content to SharePoint Online as business permits. With AvePoint's tools for hybrid management, organizations can rest assured they can robustly protect, seamlessly manage, and optimize their entire SharePoint deployment – both on-premises and in the cloud."

DocAve for Nimble SharePoint Hybrid Management

Office 365 marks the entry of new productivity online services and capabilities to provide a more unified platform for its communications and collaboration products, which will utilize the flexibility and potential cost savings the cloud computing model offers. The introduction of Office 365 gives organizations worldwide new possibilities regarding how they decide how to deploy SharePoint throughout their respective enterprises. DocAve supports the migration to SharePoint Online from previous versions of SharePoint as well as a variety of legacy platforms, including Lotus Notes and EMC Documentum.

Organizations desiring to reap the benefits of implementing a hybrid deployment consisting of both on-premises and online instances of SharePoint can do so with the DocAve Software Platform, which facilitates movement to the cloud as well as the co-existence and integration of all currently deployed SharePoint environments. DocAve has always supported hybrid SharePoint deployments, and now, organizations have another opportunity to further streamline and synchronize its Microsoft business solution with AvePoint's flagship solution with Office 365.

The DocAve Hybrid Management solution will fully support Office 365 upon its GA release, enabling organizations to take full advantage of the benefits offered by utilizing both on-premises and online SharePoint deployments throughout their enterprises.

Participation in the DocAve Beta Release for Microsoft Office 365

The beta release of the DocAve Hybrid Management solution is being made available to organizations across all verticals and geographic regions, and will be followed by a GA release upon the GA release of Office 365. To request a free trial of the beta version, please call (201) 793-1111 or email Sales@AvePoint.com.
