

DocAve Migrator Streamlines Transfer of EMC Documentum and eRoom Content to SharePoint 2010

DocAve Migrator for SharePoint enables the lossless, automated transfer of EMC Documentum and eRoom content to SharePoint 2010

Jersey City, NJ — March 17, 2010 — AvePoint, the leading provider of infrastructure management software solutions for Microsoft SharePoint, today announced that its DocAve eRoom Migrator for SharePoint and DocAve Documentum Migrator for SharePoint, tools for the comprehensive transfer of legacy eRoom and Documentum content to SharePoint, now both deliver beta support for SharePoint 2010. DocAve eRoom Migrator and DocAve Documentum Migrator are two of 24 tools available within the recently released DocAve Software Platform v5.4, and enable seamless, fully mapped migration from Documentum eRoom and EMC Documentum platforms to SharePoint.

"SharePoint 2010 is poised to transform how companies manage their people, processes, and information", said Dr. Tianyi (TJ) Jiang, AvePoint's Chief Operating Officer. "For those organizations that have been using EMC Documentum and eRoom, we wanted to provide a comprehensive tool that would allow them to transition to SharePoint without losing any data and without disrupting productivity. We wanted to remove any barriers that might have prevented organizations from taking advantage of SharePoint's singular functionality, including the barrier posed by a complex, manual migration. With DocAve Migrator, we have made the transition from EMC technologies to the Microsoft stack much more automated, more secure, and pain-free."

DocAve Migrator is the industry's most feature rich and flexible solution for the automated transfer of EMC Documentum and eRoom content to SharePoint 2007 and 2010 environments. DocAve Migrator provides the following feature set:

- Flexible mapping of all content, including eRoom discussions, notes, links, calendars, project plans, polls, databases, and templates; and Documentum repositories, cabinets, groups, folders, modules, and templates;
- Comprehensive metadata, customizations, and configurations transfer;
- Swift reorganization of existing content and automated creation of new elements upon migration to clean up existing clutter;
- Granular or bulk migration, and flexible job scheduling to mitigate productivity impact on production environments;
- DocAve's Pre-Migration Scanner delivers real-time notification of any elements that must be mapped differently in order to ensure a successful migration.

DocAve Migrator Streamlines Data Transfer from a Variety of Legacy Sources

DocAve Migrator enables the lossless, comprehensive, fully mapped migration of content to SharePoint 2007 and 2010 from a variety of legacy data sources, including Lotus Notes, Oracle/Stellent, Public Folders, OpenText Livelink, File System, HTTP/HTTPS-accessible websites, as well as from previous versions of SharePoint. Additionally, DocAve Migrator now supports the full fidelity migration of Lotus Notes Mail data into Microsoft Exchange.

Participation in the DocAve Software Platform v5.4 Beta-Release

DocAve's beta-support of SharePoint 2010 is now available to organizations across all verticals and geographic regions, and will be followed by a GA release upon GA release of SharePoint 2010. To request a free, fully enabled 30-day trial of the beta-version of the DocAve Software Platform v5.4, please visit <http://www.avepoint.com/resources/free-trial-downloads/>.
