

AvePoint's DocAve Migrator Enables a Swift Transition from Lotus Notes to SharePoint 2010

AvePoint's latest release of its DocAve Migrator tool empowers organizations to make a lossless, fully-mapped migration from Lotus Notes to SharePoint 2007 and 2010

Jersey City, NJ — March 17, 2010 — AvePoint, the leading provider of infrastructure management software solutions for Microsoft SharePoint, today announced that DocAve Migrator for SharePoint, a tool for the comprehensive transfer of legacy content to SharePoint, now provides beta support for migrations to SharePoint 2010. DocAve Migrator is one of 24 tools available within the recently released DocAve Software Platform v5.4, and provides seamless, comprehensive transfer of content from Lotus Notes to SharePoint.

"SharePoint 2010 delivers the capabilities and functionality organizations demand of their information management platforms", said Dr. Tianyi (TJ) Jiang, AvePoint's Chief Operating Officer. "As they make plans to transition to SharePoint from legacy platforms like Lotus Notes, it is critical they have the tools to make the migration secure, complete, and in-line with their business schedules. DocAve Migrator is that tool, and we are pleased to announce that it is now SharePoint 2010 ready."

With DocAve Lotus Notes Migrator for SharePoint, companies using Lotus Notes will have the ability to perform a secure and lossless migration to SharePoint 2010, leveraging the following features:

- Flexible mapping of all content, documents and other collaborative assets from Lotus Notes/QuickPlace/Quickr – including built-in Notes workflows, Notes document libraries, and built-in views – to SharePoint 2007 and 2010 lists, libraries, sites, workflows, and wiki destinations;
- Swift reorganization of legacy content, and automated creation of new elements upon migration to clean up existing clutter;
- Granular or bulk content migration and flexible job scheduling to mitigate negative productivity impact;
- DocAve's Pre-Migration Scanner will detect and notify you of any elements that must be mapped in order to ensure a successful migration.

Part of a Comprehensive Notes-to-Microsoft Migration Solution

DocAve Lotus Notes Migrator for SharePoint is only one of three tools within the DocAve Notes Transition Suite, which also includes DocAve Notes Migrator for Exchange and DocAve Replicator for SharePoint. DocAve Notes Migrator for Exchange enables the automated migration of Lotus Notes application content to SharePoint, while DocAve Replicator delivers real-time synchronization of SharePoint content to mirror Lotus Notes server architecture. Together, the tools empower organizations to efficiently transfer from Lotus Notes to the Microsoft stack, and ensure a highly performant platform following the transition.

The DocAve Software Platform offers 24 independently deployable modules for SharePoint data protection, administration, replication, storage optimization, reporting, compliance, and migration. With a fully distributed architecture, and piloted via a unified, browser-based interface, DocAve is the industry's most feature-rich and flexible solution for the migration of legacy data into Microsoft technologies, and the efficient management of SharePoint infrastructure.

Participation in the DocAve Software Platform v5.4 Beta-Release

DocAve's beta-support of SharePoint 2010 is now available to organizations across all verticals and geographic regions, and will be followed by a GA release upon GA release of SharePoint 2010. To request a free, fully enabled 30-day trial of the beta-version of the DocAve Software Platform v5.4, please visit <http://www.avepoint.com/resources/free-trial-downloads/>.
