

## DocAve Unleashes the Power of SharePoint

***New DocAve 5.0 designed to accelerate and optimize SharePoint implementations with industry's most comprehensive solution-set***

JERSEY CITY, NJ, September 15, 2008 – AvePoint, the leading provider of infrastructure management software solutions for Microsoft SharePoint, today announced that its DocAve Software Platform 5.0 has achieved unprecedented alignment with Microsoft SharePoint Products and Technologies; empowering organizations to accelerate deployment, streamline administration, and enhance worker collaboration. Leveraging the groundbreaking functionality of DocAve, customers can effectively meet rigorous management and protection standards, and ensure a truly reliable, highly available, and efficiently scalable SharePoint platform.

SharePoint adoption continues to accelerate due to the platform's singular productivity and collaboration capabilities. But realizing maximum value out of the platform demands proper planning, well-defined deployment and management strategies, and the tools and resources necessary to support these strategies. DocAve 5.0 - the next generation of AvePoint's flagship SharePoint infrastructure management software - helps meet these vital objectives, with the most comprehensive, potent, and flexible tools in the industry. DocAve unleashes SharePoint's full potential in several ways:

### **SharePoint Deployment and Company-Wide Expansion**

Some organizations have delayed deployment or expansion of SharePoint because decision-makers are not fully confident the platform has appropriate corporate controls or sufficient disaster recovery strategies in place. DocAve provides the comprehensive administration, compliance, and data protection solutions needed to instill the confidence stakeholders demand to scale SharePoint according to business-needs.

DocAve's *Backup and Recovery* and *High Availability* modules deliver deft and effective item-level through platform-level protection; DocAve's *Compliance Archiver* and *Auditor* modules give organizations the power to meet even the most stringent regulatory obligations; DocAve's *Replicator* module empowers organizations with the ability to expand their SharePoint deployment globally with 'real-time' synchronization of geographically distributed farms; and DocAve's *Deployment Manager* module enables efficient propagation of customizations, settings, and SharePoint Designer elements throughout the enterprise.

DocAve lets organizations accelerate time-to-value and maximize their return on investment. With DocAve, administrators and other key stakeholders have the ability and confidence to utilize SharePoint to its fullest for ultimate business achievement

### **Seamless Transition to SharePoint as Unified Knowledge-Repository**

Consolidating digital assets into a single platform is a critical step towards optimizing end-user productivity and efficiency. With its exclusive dedication to SharePoint enhancement products, DocAve offers the industry's most flexible and complete solutions for full-fidelity, fully-mapped migration of content, configurations, and settings from legacy data repositories. DocAve's *Migrator Suite* lets organization's seamlessly and quickly transition to SharePoint without any loss of data or metadata. The financial and logistical burdens resulting from reliance on outdated legacy platforms can be easily overcome with DocAve's array of migration modules. DocAve supports migration to SharePoint from the following sources: Exchange Public Folders, File Systems, Lotus Notes, EMC eRoom, and older versions of SharePoint.

### **Effective Governance and Administration**

The power of Microsoft SharePoint - enhanced by DocAve's administration and management modules - delivers the robust feature-set organizations need to govern and deploy their environments with precision and accuracy. DocAve *SharePoint Administrator* provides truly centralized, top-down administration for deployments of any size. By enabling granular and bulk management for all settings, securities, and configurations - for any number of farms - DocAve *SharePoint Administrator* provides organizations with the flexibility and exacting control today's business and regulatory environment requires. DocAve's *Content Manager* module gives administrators the ability to move and reorganize SharePoint objects with accuracy and speed, meaning they can architect deployments as fast as business demands. With DocAve, effective governance is attained, unfettered scalability is achieved, and organizational resources are optimized.

“Organizations are investing significant resources to deploy and administer SharePoint”, said Dr. Tianyi Jiang, chief operating officer of AvePoint. “But the challenges involved with managing a platform of such complex architecture often limit many organizations’ abilities to fully harness SharePoint’s power as an enterprise-wide collaboration and portal solution. Customers were in need of a unified and integrated toolset to address these challenges, and we are honored to offer it with the DocAve Software Platform.”
