

AvePoint to Sponsor Upcoming Infrastructure Saturday Brisbane Event

AvePoint will also lead a session sharing vital tips and strategies for optimising SharePoint architecture and storage management

Melbourne, Australia — November 4, 2010 — AvePoint, the world's largest provider of infrastructure management software solutions for Microsoft SharePoint Products and Solutions, today announced that it is a sponsor of Infrastructure Saturday Brisbane, taking place 6 November 2010 at the Microsoft Brisbane Office. AvePoint's support of the event underscores the company's ongoing commitment to work closely with the SharePoint community in Australia and provide solutions, services, and thought leadership striving to help organisations fully realise the benefits the platform offers. The one-day event offers attendees a diverse set of sessions on all Microsoft Server products, as well as the opportunity to network with fellow system administrators, system engineers, architects, and other IT professionals.

"We are excited to be sponsoring and participating in Infrastructure Saturday Brisbane", said Garth Luke, Vice President of Sales and North American Alliances at AvePoint. "Throughout Australia, organisations are quickly recognising how SharePoint Products and Technologies can help optimise their businesses, and we are committed to providing these companies with the solutions and expertise necessary to ensure a successful SharePoint deployment. This newly established event is a fantastic venue for us to provide the SharePoint community in Australia with this information."

DocAve for a Complete SharePoint Server 2010 Experience

SharePoint Server 2010 delivers numerous feature enhancements that firmly position SharePoint as the ideal enterprise content management and development platform for today's ever-evolving business landscape. AvePoint's flagship product, the DocAve Software Platform, delivers full infrastructure management support for both SharePoint Server 2010 and Microsoft Office SharePoint Server 2007 environments. With a unified, browser-based user interface and a fully distributed architecture, DocAve offers more than 25 independently deployable modules for SharePoint data protection, administration, replication, migration, archiving, deployment management, reporting, storage optimisation, and content lifecycle management.

Join AvePoint for Proven Practices on SharePoint Architecture and Storage Optimisation

In addition to AvePoint's sponsorship of Infrastructure Saturday Brisbane, Jesse Fallowfield, AvePoint Sales Manager, will lead a session entitled: "Intelligent SharePoint Architecture and Storage Optimisation Strategies".

Proper architecture design and intelligent storage management are both critical in the pursuit of a successful SharePoint deployment. During this session, Mr. Fallowfield will first discuss how to build an efficient and scalable SharePoint architecture based upon your organisation's unique business objectives, usage patterns, and deployment size and distribution. He will then review strategies for ensuring top platform performance by expanding SharePoint's SQL storage infrastructure through intelligent archiving, efficient BLOB content management, and migration-free SharePoint management of legacy data stores such as file shares.
