# How DocAve 6 Delivers for Your Business

## Increasing Business Productivity

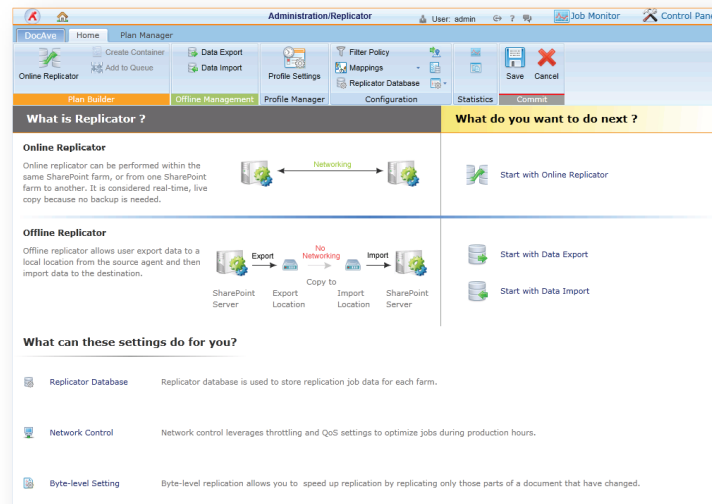

DocAve 6 helps organizations increase business productivity using SharePoint by delivering high-performance, global collaboration without hindrance from network limitations or content availability.

- Enable seamless global SharePoint service
- Optimize content availability
- Improve quality of service
- Consolidate document access to a single user experience

## Reducing Total Cost of Ownership

DocAve 6 improves operational efficiency within SharePoint, simplifying and automating administration and management with the platform's powerful reporting, batch deployment, scheduling, and security-trimmed capabilities.

- Empower business users while enforcing policies and standards
- Provide insight into operations, performance, and usage
- Integrate and support leading SharePoint hardware and software solutions
- Consolidate and integrate legacy content management systems

## Enhancing IT Assurance

DocAve 6 improves quality of service and minimizes business disruption by optimizing infrastructure and performance, and by integrating with enterprise-class storage platforms.

- Meet requirements for long-term content and information management
- Protect business content with support for enterprise-caliber Service Level Agreements
- Architect a highly available service resilient in the face of disaster
- Protect the content and configuration of leading third-party SharePoint applications and services

## Enabling Security and Compliance Initiatives

DocAve 6 enables an organization to standardize, apply, and enforce corporate and IT policies across distributed content throughout the entire information lifecycle.

- Provision user permissions to content
- Filter new and modified content to apply policy
- Implement sophisticated auditing policies
- Archive content to tiered storage

# Did you know?...

## Under the Hood

DocAve 6 offers the enterprise scalability organizations demand to support their growing SharePoint environments, and is entirely based on Microsoft technologies and standards, including .NET, WCF, and Silverlight, leveraging only fully supported Microsoft methodologies and APIs.

DocAve 6 offers organizations a rich client console focused on making common management tasks even easier, with wizard-based functionality and a familiar ribbon interface.

## Innovation Delivered

DocAve 6 is the culmination of AvePoint's 10-plus years of experience supporting more than 8,000 enterprises across 63 countries – including SharePoint environments consisting of up to hundreds of servers and petabytes of data.

Your SharePoint. Our Innovation.  
**Governance Delivered.**
