AvePoint® DocAve® Backup for Salesforce®

Product Brochure

DOCAVE BACKUP
FOR SALESFORCE

Protect. Deletion of Salesforce data can bring your organization to a standstill. Natively, Salesforce offers a limited and expensive backup and restore option. DocAve Backup for Salesforce protects your data with comprehensive, automatic backups and the ability to restore data from an entire platform down to a single field with the click of a button.

KEY BENEFITS

ONE-CLICK SALESFORCE BACKUP

Easy setup gets the business back to the task at hand. Simply sign into DocAve Backup for Salesforce with your Salesforce account, and backup of your production and sandbox organizations will begin automatically.

COMPREHENSIVE RESTORE OPTIONS

Accidents happen, but don't let them interrupt your day. DocAve Backup for Salesforce quickly restores at the organization, object, record, and field levels. Whether you need to restore in bulk or granularly, DocAve Backup for Salesforce has you covered.

CENTRAL COMMAND DASHBOARD

Run an extra backup, view usage graphs, and audit user activities from an easy-to-use, centralized dashboard.

ENCRYPTED AND SECURE DATA PROTECTION

DocAve Backup for Salesforce is hosted in the cloud, utilizing Microsoft Azure Encryption in conjunction with user account security to meet compliance regulations around sensitive data.

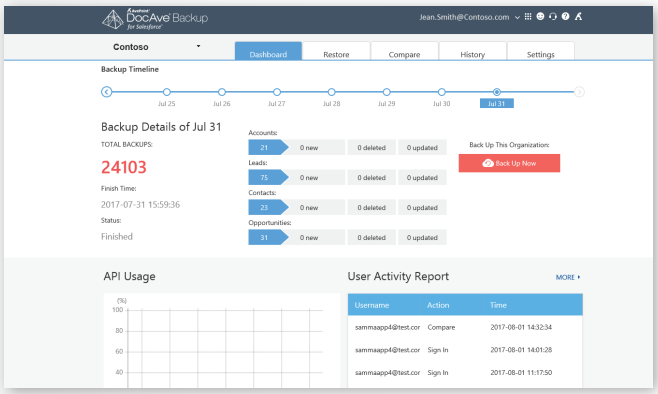
ACCIDENTS HAPPEN. QUICKLY RESTORE ORDER WITH DOCAVE BACKUP FOR SALESFORCE.

Data loss happens – and more often than not, it's due to user error. When it comes to Salesforce, native data protection options are costly and require a significant amount of effort. At a fraction of the cost of other solutions, DocAve Backup for Salesforce provides a combination of automatic daily backups, on-demand backups, and comprehensive data restore capabilities to keep your business moving forward.

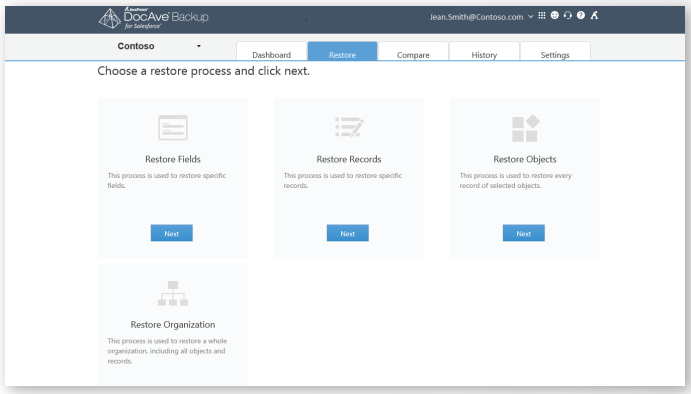
100% cloud-hosted. No installation. No configuration.

TECHNICAL OVERVIEW

- Start automatic, daily, and comprehensive backup of your Salesforce data as soon as you sign into AvePoint Online Services with your Salesforce account
- In conjunction with automatic daily backups, schedule additional backup jobs up to five times per day with the click of a button
- Compare backup versions to understand how your Salesforce objects and metadata have changed, making it easier for you to restore data from the right backup
- Support restoration of Salesforce data at the organization, object, record, and field levels
- Perform out-of-place restoration of Salesforce data with full fidelity and user mapping to any connected production or sandbox Salesforce organization
- Preview and double-check the amount of records for each selected object type before performing an object restore to ensure accuracy
- Support restoration of parent and child relationship records to ensure that Salesforce data maintains integrity
- Quickly locate the specific records you need to restore through keyword search capability
- Allow end users to restore a record or fields of a record directly via the Salesforce interface, rather than relying on administrators
- Comprehensively review backup and restore details – including records, time, and job status – as well as information on frequently-used objects – including accounts, leads, contacts, and opportunities – via the Central Command Dashboard or history reports
- Gain full visibility of how your Salesforce backup and restore service is being used by auditing user actions – including login, backup, and restore
- Trim security for specific users by either granting access to or limiting available features according to their role



Central Command Dashboard summarizes backup history, API usage, and user activity for all organizations in Salesforce.



Salesforce backup comparison reports help you understand how objects and metadata change over time.
