

AVEPOINT PROJECT TRANSPARENCY

PROJECT VISIBILITY: CAMPAIGN DELIVERY

Step 1

Suzy, a state representative, made a campaign promise to revamp the online healthcare marketplace by year-end.

Step 2

After winning the election, she logs into her executive dashboard to check the progress of the online healthcare marketplace revamp project.

Suzy contacts the project manager, Ernie, about expediting the revamp.

Step 3

With the due date moved up, Ernie updates scheduling and pending tasks. His remote team is automatically notified.

Budgeting figures and easy-to-follow job statuses are shared.

Step 4

Ernie shares progress indicators with Suzy and confirms the site re-launch is on schedule and on budget.

Step 5

Project milestones, blog posts, and upcoming site features are exported to a public-facing dashboard to inform citizens and show that Suzy is delivering on her campaign promise.

End Result

Your Citizens

Gain easy access to valuable information – like project updates in real-time – that spurs support for your organization.

Your Project Teams

Use familiar technology to work together and take immediate action on critical task updates from anywhere, anytime to better achieve their goals.

Your Project Managers

Promote and maintain accountability by distributing new information effortlessly.

Your Agency

Builds public trust, while maintaining internal data integrity.
Increases internal efficiencies to avoid crises and deliver results on time.
