DocAve Overview

The award-winning DocAve family of products addresses the need for fast, flexible, and real-time data protection, administration, compliance, migration, reporting, and storage optimization support for your Microsoft® SharePoint® deployments. With DocAve you can protect, manage, and optimize individual SharePoint farms or multiple farms from a single, user friendly, web-based console. Full integration of all components enables DocAve to support organizations as they continue to evolve in their usage of SharePoint.

The DocAve family of products serves a variety of business-critical SharePoint functions. DocAve will seamlessly transition your organization to Microsoft SharePoint 2010 from prior versions of SharePoint or even various legacy data platforms, while at the same time intelligently protecting your mission-critical data, including full-farm backup of customizations such as the GAC, IIS, and SharePoint Hive in order to satisfy the most stringent SLA's. You can also ensure efficient platform management and iron-clad governance with DocAve's automated deployment management, centralized user and platform administration, and robust reporting functionality.

About AvePoint

AvePoint is a global technology company and software leader headquartered in the United States. Since its founding in 2001, AvePoint has become one of the world's largest provider of infrastructure management software solutions for SharePoint. Propelled by one of the world's largest SharePoint-exclusive research & development team, AvePoint is a premier provider for businesses demanding the most powerful and flexible infrastructure management solutions for their SharePoint environments and assets. AvePoint's award-winning DocAve Software Platform is recognized as an industry standard for comprehensive, scalable, and modules for SharePoint backup and recovery, administration, replication, migration, archiving, deployment management, reporting, storage optimization, and content lifecycle management solutions.

AvePoint is headquartered and maintains its principle engineering center in Jersey City, NJ, with wholly owned sales and engineering centers in the USA - San Jose, Los Angeles, Seattle, Chicago, Washington DC, Houston, Boston; Ontario, Canada; Melbourne, Australia; London, United Kingdom; Munich, Germany; Johannesburg, South Africa; Tokyo, Japan; Singapore; and China - Beijing, Changchun, Dalian. AvePoint's global team, fortified by an expansive network of certified partners, helps more than 8,000 enterprise customers – including many Fortune 500 companies and government agencies – to protect, manage, and optimize their mission-critical SharePoint environments. AvePoint is a Gold Certified Microsoft Partner and GSA provider.

*As with all AvePoint software, the DocAve Software Platform leverages only fully supported Microsoft methodologies and API's.

DocAve Software Platform

AvePoint's DocAve Software Platform is a robust, scalable enterprise software platform comprised of numerous integrated, independently deployable software solutions organizations desire for true enterprise-class governance for Microsoft SharePoint.

Migration

Migrator for SharePoint
Minimize time and effort required to transition content management initiatives to SharePoint by utilizing seamless, fully mapped transfer of content from legacy systems to SharePoint 2010

- SharePoint 2001, 2003, 2007
- Exchange Public Folders
- Documentum / eRoom
- Open Text Livelink/ Vignette
- Lotus Notes/ QuickPlace
- Oracle Stellent
- Static, HTTP/S accessible web content and internet sites
- MCMS2002 (Microsoft Content Management Server 2002)

Integration

Connector
Seamless integration of external file-based content into SharePoint

- **File Share Connector**
Migration-free attachment of large documents stored on network and cloud file shares
- **Media Connector**
Stream audio and video files stored on any network or cloud file share

Replicator for SharePoint

Real time one-way, two-way, and one-to-many synchronization of SharePoint content and farms

Replicator for Salesforce
Integration between SharePoint and Salesforce

- **Content Replicator**
Synchronization of SharePoint content to Salesforce Content Libraries
- **Data Replicator**
Synchronization of Salesforce CRM data to SharePoint

Management

Administrator
One interface to discovery and manage all configurations, security, and settings across SharePoint farms

Deployment Manager
Automate change management of content, customizations, and applications to mitigate management risk, improve operational efficiency, and improve user experience and interaction

Content Manager

Real-time, point-and-click movement of SharePoint content for swift reorganization

Content Shield

Periodically scan content to ensure compliance with evolving regulations

Replicator
Automate publication of SharePoint content in real time or on a schedule

Report Center
Gain insight into a wide variety of usage and trending statistics to make better management decisions

Optimization

Report Center
View storage, network, and usage statistics and trending to ensure optimal performance

Extender
Instantly offload BLOBs to file-based storage to optimize SQL database resources, lower SharePoint storage costs, improve performance, and increase scalability

Archiver
Business-rule aware archiving of SharePoint content, including sites, lists, libraries, or document versions, for optimal platform performance and reduced storage costs

Connector
Provide access to all file-based content, through SharePoint while keeping SQL resources optimised

- **File Share Connector**
Migration-free attachment of large documents stored on network and cloud file shares
- **Media Connector**
Stream audio and video files stored on any network or cloud file share

Protection

Backup and Restore
Enhance business continuity with intelligent item-through platform-level data protection and simplified restores of all SharePoint assets, including content, customizations, workflows, as well as search and index information

High Availability
Ensure continuous SharePoint platform availability with one-switch failover to stand-by content in the event of network failure, downtime, or disaster

Content Shield
Scan all content prior to upload to ensure proactive compliance

Vault
Retain all SharePoint content in immutable form, and search with ease for total compliance

Reporting

Auditor
Record and report upon all SharePoint events and activity

Report Center
Single pane access to a wide variety of mission-critical data and trending statistics

Monitor
Real-time graphical topology of SharePoint environments, including all servers and their functions, relationships, roles, services, and system health

eDiscovery
Search and report upon all SharePoint content for precision legal response

Additional AvePoint Solution:

DocAve for Salesforce: The industry's most powerful and flexible solution, with three independently deployable modules, for the protection and integration of Salesforce CRM data.
