## Organized, Efficient, and Stress-Free Migration to SharePoint

DocAve Migrator provides an efficient, cost-effective solution for migrating business-critical content from various electronic repositories onto the latest, feature-rich releases of Microsoft® SharePoint®. DocAve's innovative and reliable data transfer is unique in its ability to granularly migrate content down to individual items while retaining all associated metadata, enabling SharePoint administrators to easily automate the process of consolidating multiple content sources onto the platform while maximizing return on investment for content residing in legacy repositories.

### DocAve Supports the Following Data Sources:

<b>Microsoft SharePoint</b>	SharePoint 2001/2003/2007 ▶ SharePoint 2003/2007/2010
<b>Public Folders</b>	Exchange Public Folders ▶ SharePoint 2003/2007/2010
<b>File Systems</b>	File Systems ▶ SharePoint 2007/2010
<b>Documentum eRoom</b>	Documentum eRoom ▶ SharePoint 2007/2010
<b>EMC Documentum</b>	EMC Documentum ▶ SharePoint 2007/2010
<b>Lotus Notes</b>	Lotus Notes ▶ SharePoint 2007/2010
<b>Open Text LiveLink/Vignette</b>	Livelihood /Vignette ▶ SharePoint 2007/2010
<b>Oracle/Stellent</b>	Oracle/Stellent ▶ SharePoint 2007/2010

With truly centralized administration, all migration tasks can be easily setup, scheduled, and monitored from a single, browser-based interface. Co-existence of the SharePoint platform and all legacy content sources during the migration process enables flexible data migration according to business needs and deployment schedules. With the option to map metadata into SharePoint 2010 Managed Metadata columns, organizations can deploy quickly and take advantage of all the platform has to offer. No special hardware is required to deploy the DocAve Software Platform – it can run within your existing infrastructure.

## Business Advantages

- **Minimize the Business Impact of Migration**  
DocAve Migrator transfers content from legacy repositories to Microsoft SharePoint in an organized and efficient manner. This improves IT productivity and reduces the time-to-value for deploying SharePoint as a standard collaboration platform.
- **Protect Investments and Mission-Critical Information**  
Business-critical information residing in legacy content sources is kept intact. Folder structures, attachments, document properties, and all associated metadata are retained with full fidelity. End-users can confidently continue to access their content without interruption.
- **Flexible Scheduling for Migration**  
Migrate an entire instance or just an individual content item. Reorganize your information architecture upon migration to clean up existing clutter. Granular or bulk content migration as well as flexible job scheduling empowers administrators to plan migration jobs according to business needs, reducing negative impact on production environments.
