AvePoint® DocAve® 6

DOCAVE EDISCOVERY
FOR MICROSOFT® SHAREPOINT® EDISCOVERY

Manage. Respond to legal eDiscovery requests for Microsoft SharePoint Server 2013 and SharePoint Server 2010 with speed and precision.

KEY BENEFITS

COMPREHENSIVE SEARCH

QUICK RESPONSE TO LEGAL REQUESTS

PROACTIVE LEGAL COMPLIANCE

Streamline the search for required data with flexible and complete metadata as well as full-text based searches, including both active and archived SharePoint content as well as newsfeed posts.

Satisfy eDiscovery requests without burdening staff and resources by delivering data to any requesting party via Concordance or Electronic Discovery Reference Model (EDRM) compatible formats containing every required data point, including critical metadata.

Implement proactive legal compliance by efficiently implementing and managing legal holds for specific SharePoint content on demand.

RESPOND QUICKLY AND CLEARLY TO LEGAL INQUIRIES AND REQUESTS

Content residing in SharePoint must be made available in a timely and comprehensive manner for legal inquiries, without burdening staff and resources. DocAve eDiscovery utilizes SharePoint Search Index data to scan and archive content, subsequently identifying responsive materials by both full context search and metadata field(s). Once identified, these materials – along with all associated metadata and audit histories – are exported to multiple file formats for external, third-party review in order to meet all eDiscovery obligations.

TECHNICAL OVERVIEW

- Full text index search of all active and archived SharePoint content and newsfeed posts by keyword, native metadata, as well as customized metadata

- Easily export search results in .csv format for external review and third-party delivery

- Export eDiscovery search results – including individual list items – with only relevant metadata and audit histories

- Implement Legal Holds on SharePoint items to limit access or modification rights and create immutable, full-fidelity copies of held content

- View and manage all legal holds from a central interface within Hold Manager

- Export active and archived SharePoint content into Concordance load files or EDRM XML file formats

- Perform advanced and complex searches without affecting performance of your SharePoint environment via load-balanced searching and utilization of SharePoint Index Data

Simplify the search for critical content for legal holds while maintaining metadata.
